# APPROVAL SHEET

Product Name : Safety Certified Multilayer Ceramic Chip Capacitors

Part No. : FK / FH Series

Description : X1/Y2 & X2 Class, Size 1808~2220, C0G/X7R, 250VAC & UL E231248 Certified, Size 1206, X7R, 2.5KVDC

# SPECIFICATION

## FOR

**Product Name** : Safety Certified Multilayer Ceramic Chip Capacitors

**Part No.** : FK / FH Series

**Description** : X1/Y2 & X2 Class, Size 1808~2220, C0G/X7R, 250VAC & UL E231248 Certified, Size 1206, X7R, 2.5KVDC

<b>SPEC. No.</b>	: <u>FKFH-000-001-03</u>
<b>DATE</b>	:

DRAWN BY	CHECEKED BY	APPROVED BY
<b>Yvens Chou</b>	<b>Yvens Chou</b>	<b>Ryan Chen</b>

## 1. INTRODUCTION

PROSPERITY's SAFETY CERTIFIED CAPACITORS are designed for surge or lightning immunity in modem facsimile and other equipments. The capacitors of series FK are class X1/Y2 compliant respectively.

The green type capacitors in FK series are manufactured by using environmentally friendly materials without lead or cadmium.

The terminations are composed of plated nickel and pure tin to feature the superior leaching resistance during soldering.

## 2. FEATURES

- High reliability and stability.
- Small size and high capacitance.
- RoHS compliant.
- Safety standard approval by :  
EN 60384-14 : 2013  
IEC 60384-14 : 2013  
UL 60384-14 (Ed 2.0)  
UL 62368-1 (2nd Edition)
- Certificate number :  
R 50041666 & R 50359148 by TUV.  
E346791 (FOWX2/8) by UL, E231248 by UL.
- HALOGEN compliant.

## 3. APPLICATIONS

- Modem.
- Facsimile.
- Telephone.
- Other electronic equipment for lightning or surge protection and isolation.

## 4. HOW TO ORDER

SPEC. No. : FKFH-000-001-03

## 10. APPLICATION NOTES

### STORAGE

To prevent the damage of solderability of terminations, the following storage conditions are recommended :

Indoors under 5 ~ 40°C and 20% ~ 70% RH.

No harmful gases containing sulfuric acid, ammonia, hydrogen sulfide or chlorine.

Packaging should not be opened until the capacitors are required for use. If opened, the pack should be re-sealed as soon as is practicable. Taped product should be stored out of direct sunlight, which might promote deterioration in tape or adhesion performance. The product is recommended to be used within 12 months after shipment and checked the solderability before use.

### HANDLING

Chip capacitors are dense, hard, brittle, and abrasive materials. They are liable to suffer mechanical damage, in the form of cracks or chips. Chip Capacitors should be handled with care to avoid contamination or damage. To use vacuum or plastic tweezers to pick up or plastic tweezers is recommended for manual placement. Tape and reeled packages are suitable for automatic pick and placement machine.

### PREHEAT

In order to minimize the risk of thermal shock during soldering, a carefully controlled preheat is required. The rate of preheat should not exceed 3°C per second.

### SOLDERING

Use mildly activated rosin RA and RMA fluxes do not use activated flux. The amount of solder in each solder joint should be controlled to prevent the damage of chip capacitors caused by the stress between solder, chips, and substrate.

a.) Hand soldering :

\* Soldering iron tip diameter ≤1.0 mm and wattage max. 20W.

\* The Capacitors shall be pre-heated and that the temperature gradient between the devices and the tip of the soldering iron.

\* The required amount of solder shall be melted on the soldering tip.

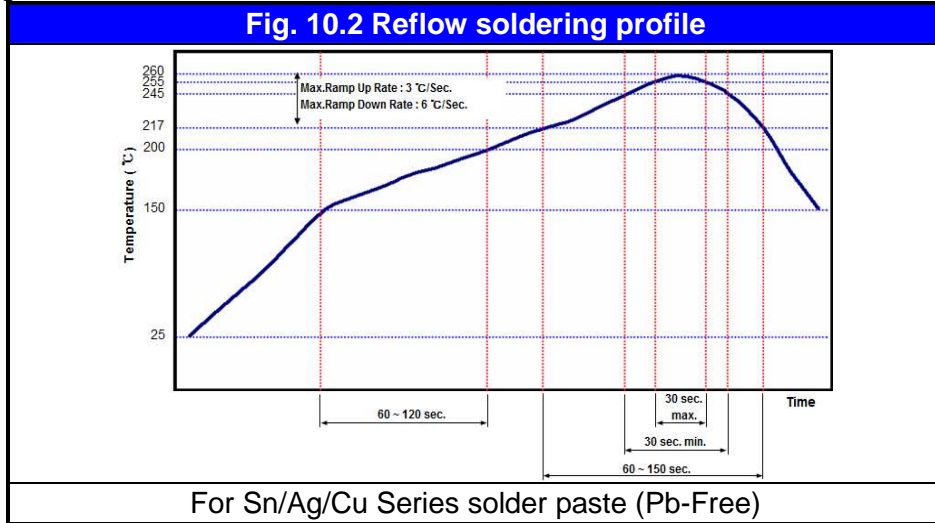

\* The tip of iron should not contact the ceramic body directly.

\* The Capacitors shall be cooled gradually at room temperature after soldering.

\* Forced air cooling is not allowed.

## 10. APPLICATION NOTES

b.) Reflow soldering :

Soldering conditions :

Class I :

Size Inch (mm)	Temper. Cher.	Capacitance	Condition	
			Wave	Reflow
≤0402(1005)	Class I - C0G	All	X	O
0603(1608)	Class I - C0G	All	O	O
0805(2012)	Class I - C0G	All	O	O
1206(3216)	Class I - C0G	All	O	O
≥1210(3225)	Class I - C0G	All	X	O

Class II :

Size Inch (mm)	Temper. Cher.	Capacitance	Condition	
			Wave	Reflow
≤0402(1005)	Class II - X7R	All	X	O
0603 (1608)	Class II - X7R	Cap. <2.2μF	O	O
		Cap. ≥2.2μF	X	O
0805 (2012)	Class II - X7R	Cap. <4.7μF	O	O
		Cap. ≥4.7μF	X	O
1206 (3216)	Class II - X7R	Cap. <4.7μF	O	O
		Cap. ≥4.7μF	X	O
≥1210 (3225)	Class II - X7R	All	X	O

## 10. APPLICATION NOTES

Soldering height :

The solder climbing minimum height is suggesting to 25% of chip thickness or 500um whichever is less.  
(Reference from IPC-610E)

## COOLING

After soldering, cool the chips and the substrate gradually to room temperature. Natural cooling in air is recommended to minimize stress in the solder joint.

## CLEANING

All flux residues must be removed by using suitable electronic-grade vapor-cleaning solvents to eliminate contamination that could cause electrolytic surface corrosion. Good results can be obtained by using ultrasonic cleaning of the solvent. The choice of the proper system is depends upon many factors such as component mix, flux, and solder paste and assembly method. The ability of the cleaning system to remove flux residues and contamination from under the chips is very important.
